

ELEVATE TALENT AT EVERY LEVEL

Cultivate skills, drive performance and achieve results with the leadership development workshop series from Rockstar Workforce.

About us

At Rockstar Workforce, we hold a fundamental belief: everyone has the potential to be a leader. Our mission is to unleash this potential across all levels of an organization. Founded in 2017 by Adam and Amber Wong, our programs are designed not just to teach, but to awaken and nurture the leader within each individual.

With expertise rooted in behavioral science from TTI Success Insights, our approach is tailored and impactful. Our team, including Certified Behavioral Analysts, EQ Analysts, and Stages of Growth Analysts, focuses on creating programs that are as engaging and enjoyable as they are transformative.

We thrive on mutual accountability. Our programs encourage active participation, immersive group sessions, and practical team action learning. Our facilitators, dedicated to creating the optimal learning environment, are more than educators – they are the catalysts for revealing and enhancing your innate leadership abilities.

Join us at Rockstar Workforce, where we believe in the leader in everyone. Here, leadership is not just a skill to be learned; it is a quality to be discovered and developed within each person, transforming businesses, careers, and lives.

LET'S BE INCLUSIVE — NOT EXCLUSIVE

Imagine a workforce dedicated to developing the leader in everyone.

Prioritize Action Over Inspiration.

At Rockstar Workforce, we recognized a gap in typical leadership training, which often emphasizes motivational rhetoric without practical application, so our team developed the Leadership Mechanics™ curriculum. This program, deeply rooted in behavioral science data and proven successful, educates professionals at all levels to lead effectively through their actions and interactions.

Our curriculum begins by identifying individual leadership traits through behavioral assessments. It then evolves these traits, strengthening existing skills and bridging gaps. This approach ensures a consistent skill set across team members, leading to measurable business improvements.

Participants in our programs emerge as self-aware leaders, fostering healthier interactions across teams and departments. Businesses report enhanced team goal-setting and individual goal achievement, underscoring the practical impact of our training. Additionally, our curriculum establishes a common language within organizations, promoting open communication and better decision-making.
